Professional Summary

AI Solutions Designer and Architect with 10+ years' experience in technical business analysis, system design, and workflow automation. Specialized in Generative AI, LLM integration, and enterprise automation for the past 2+ years. Proven leader in building prompt-driven applications and driving cross-functional AI adoption, delivering measurable business impact—including up to 85% reduction in documentation time and significant cost savings. Deep technical fluency in LLMs, Agentic AI, and automation tools. Currently pursuing an M.S. in Artificial Intelligence at UT Austin.

Core AI Skills & Technical Competencies

- **Generative AI & LLMs:** Azure OpenAI (GPT-4/GPT-3.5), Generative AI (GAI), **Agentic AI**, **Prompt Engineering**, Google AI Studio, Deep Learning, NLP (Tokenization, TF-IDF).
- **Low Code Automation:** Power Automate, Power Apps, Power BI, AI Builder Custom Prompt, SharePoint, Dataverse.
- **AI/Code Tools:** GitHub Copilot, Amazon Q, Amazon Kiro, Cursor, Replit, Manus, Lightning.AI, Google Collab, VS Code
- Workflow Automation & Process Optimization
- Python (Streamlit, Pandas, NumPy, scikit-learn, Plotly)
- **Project Management Tools:** Jira (Admin), Asana, MS Project
- Technical Documentation, Wireframing, Use Case Diagrams
- Salesforce CRM (SOQL, Lead Management, Campaigns)
- **Observability Tools:** New Relic, Bugsnag, Kibana, Splunk
- BI Tools: Power BI, EazyBI, Excel Automation
- Collaboration Tools: Jira/Confluence Integration, Lucid chart, Gliffy
- Other Expertise: Requirements Analysis, User Stories, API Documentation, Agile/Scrum Facilitation

---

Professional Experience

ALIGN TECHNOLOGY, Morrisville, NC
AI Solutions Designer / Automation Expert | June 2024 – Present

Key AI Projects & Achievements:

1. **Enhanced AI User Story & Documentation Generator**
   - Architected a full-stack web application leveraging Azure OpenAI to generate user stories, test cases, and technical questions from raw requirements.
   - Integrated with JIRA via Flask (Python) backend for one-click story creation.
   - Achieved 85% reduction in documentation time and $200,000+ annual cost savings.
2. **Doctor Locator Support Automation with GPT-5**
   - Engineered Power Automate flow to capture support emails and classify them using GPT-5 API.
   - Automated detection of Region, Issue Type, and Status; delivered real-time ticket management via Power Apps dashboard.
3. **AI-Driven Weekly Project Summary Generator**
   - Built Power Automate workflow to aggregate emails and generate weekly project summaries using AI Builder Custom Prompt.

    - Eliminated manual status reporting, ensured consistent and traceable audit artifacts.

Additional Responsibilities:

- Optimized developer productivity by integrating GitHub Copilot and Amazon Q into daily coding workflows.
- Centralized performance/log monitoring for 20+ web applications; implemented AI-driven error detection and notifications.
- Managed Agile ceremonies for multiple teams; applied Atlassian AI for sprint planning and EazyBI for velocity tracking.

Sr. Technical Business Solution Analyst | Dec 2021 – June 2024

- Delivered consumer/provider web apps, ensuring seamless UX and robust technical implementation.
- Led Generative AI adoption for requirements and documentation, reducing manual effort by 40%.
- Implemented AI-driven sprint planning and backlog prioritization, improving accuracy by 25%.
- Managed multiple Scrum teams and optimized performance through AI-assisted retrospectives.
- Automated web app monitoring and reporting, increasing sprint visibility by 30%.
- Oversaw Salesforce CRM for lead/campaign management and analytics.

Sr. Business Systems Analyst & Scrum Master
Align Technology, Hyderabad, IN | August 2018 – December 2021

- Led technical implementation efforts for web applications serving consumer and provider portals.
- Designed interactive wireframes and UI prototypes in Figma for front-end applications.
- Managed Heroku apps, monitored uptime/downtime and performance
- Led Agile workflows, implementing Jira automation to enhance project management efficiency.

Business Analyst/SQA
Microsoft, Hyderabad, IN | June 2013 – August 2018

- Defined functional specifications and performed UAT for large-scale enterprise projects.
- Gathered and documented functional requirements, authored user stories and acceptance criteria

---

Education

- **Master of Science in Artificial Intelligence** – University of Texas at Austin *(Pursuing, Expected July 2026)*
- **Bachelor of Engineering in Computer Science** – SLIET, Sangrur, Punjab *(2012)*

Certifications

- PSPO & PSM — Scrum.org
- IIBA Business Analysis Certification
- Generative AI — Microsoft & LinkedIn
- Python PCEP — Python Institute
- Jira Admin & Project Management — Atlassian

Publications & Coursework

- **Hindi Fake News Detection using Deep Learning (Academic Project)**
    - Compared traditional ML models (Logistic Regression, SVM) vs. LSTM for Hindi text classification.
    - Applied advanced NLP preprocessing to a dataset of 17,124 articles.
    - Achieved 83% accuracy and 0.89 AUC with LSTM, demonstrating the advantage of sequential models for complex text data.
- Completed Course works: Deep Learning, Machine Learning, Reinforcement Learning, Case Study in Machine Learning, Ethics in AI
