Professional Summary

AI Solution Designer / GenAI Practitioner with 10+ years of experience delivering enterprise AI, automation, and digital solutions. Hands-on experience designing Azure OpenAI-based applications, RAG-enabled assistants, prompt-driven workflows, and Python/API integrations. Skilled in partnering with stakeholders to define AI use cases, translate business requirements into scalable solutions, and deliver enterprise-grade copilots, document intelligence, and conversational AI experiences. Familiar with LangChain, prompt engineering, and modern AI orchestration patterns, with growing specialization in responsible AI and model evaluation. Deep technical fluency in LLMs, Agentic AI, and automation tools.
.

Core AI Skills & Technical Competencies

- **Generative AI & LLMs:** Azure OpenAI (GPT-4/GPT-3.5), Azure AI Studio, Responsible AI, AI Governance, Generative AI (GAI), RAG (Retrieval-Augmented Generation), Agentic Workflows, and RASA (Intent/Entity/Dialogue), Agentic AI, Prompt Engineering, Google AI Studio, Deep Learning, NLP (Tokenization, TF-IDF).
- **Low Code Automation:** Power Automate, Power Apps, Power BI, AI Builder Custom Prompt, SharePoint, Dataverse.
- **AI/Code Tools:** GitHub Copilot, Amazon Q, Amazon Kiro, Cursor, Replit, Manus, Lightning.AI, Google Collab, VS Code
- Workflow Automation & Process Optimization
- Python (Streamlit, Pandas, NumPy, scikit-learn, Plotly, PyTorch, LangChain. LangGraph)
- **Project Management Tools:** Jira (Admin), Asana, MS Project
- Technical Documentation, Wireframing, Use Case Diagrams
- Salesforce CRM (SOQL, Lead Management, Campaigns)
- **Observability Tools:** New Relic, Bugsnag, Kibana, Splunk
- BI Tools: Power BI, EazyBI, Excel Automation
- Collaboration Tools: Jira/Confluence Integration, Lucid chart, Gliffy
- Other Expertise: Requirements Analysis, User Stories, API Documentation, Agile/Scrum Facilitation

---

Professional Experience

ALIGN TECHNOLOGY, Morrisville, NC
AI Solutions Designer / AI integration & Automation | June 2024 – Present

Key AI Projects & Achievements:

1. **Enhanced AI User Story & Documentation Generator**
    - Architected an enterprise GenAI application on Azure OpenAI to transform raw requirements into user stories, test cases, and technical questionnaires, using Python/Flask APIs and prompt-engineering techniques to improve delivery speed and consistency.
    - Integrated with JIRA via Flask (Python) backend for one-click story creation.
    - Achieved 85% reduction in documentation time and $200,000+ annual cost savings.

2. **Doctor Locator Support Automation with GPT-5**
    - Engineered Power Automate flow to capture support emails and classify them using GPT-5 API.
    - Automated detection of Region, Issue Type, and Status; delivered real-time ticket management via Power Apps dashboard.
3. **AI-Driven Weekly Project Summary Generator**
    - Built Power Automate workflow to aggregate emails and generate weekly project summaries using AI Builder Custom Prompt.
    - Eliminated manual status reporting, ensured consistent and traceable audit artifacts.

Additional Responsibilities:

- Supported responsible AI adoption through auditable workflows and human-in-the-loop validation.
- Acted as the primary bridge between stakeholders and AI engineers, eliciting requirements for agentic AI initiatives and ensuring consistent UX
- Optimized developer productivity by integrating GitHub Copilot and Amazon Q into daily coding workflows.
- Centralized performance/log monitoring for 20+ web applications; implemented AI-driven error detection and notifications.
- Managed Agile ceremonies for multiple teams; applied Atlassian AI for sprint planning and EazyBI for velocity tracking.

Sr. Technical Solution Analyst | Dec 2021 – June 2024

- Delivered consumer/provider web apps, ensuring seamless UX and robust technical implementation.
- Led GenAI adoption for documentation and managed Scrum teams, utilizing AI-assisted retrospectives to reduce manual effort by 40%.
- Automated web app monitoring and reporting, increasing sprint visibility by 30%.
- Oversaw Salesforce CRM for lead/campaign management and analytics.

Sr. Systems Analyst
Align Technology, Hyderabad, IN | August 2018 – December 2021

- Defined functional specifications and acceptance criteria for large-scale enterprise conversational systems and portals, leading UAT and business sign-off.
- Designed interactive wireframes and UI prototypes in Figma for front-end applications.
- Managed Heroku apps, monitored uptime/downtime and performance

Business Analyst/SQA
Microsoft, Hyderabad, IN | June 2013 – August 2018

- Defined functional specifications and performed UAT for large-scale enterprise projects.
- Gathered and documented functional requirements, authored user stories and acceptance criteria

---

Education

- **Master of Science in Artificial Intelligence** – University of Texas at Austin *(Pursuing, Expected July 2026)*
- **Bachelor of Engineering in Computer Science** – SLIET, Sangrur, Punjab *(2012)*

Certifications

- PSPO & PSM — Scrum.org
- IIBA Business Analysis Certification
- Generative AI — Microsoft & LinkedIn
- Python PCEP — Python Institute
- Jira Admin & Project Management — Atlassian

Publications & Coursework

- **Chaudhari, Manish.**
  Detecting Fake News in Hindi Using Machine Learning and Deep Learning Techniques.
