Professional Summary

Techno-functional Product Manager and Product Owner with 13 years of experience driving enterprise product vision, roadmaps, and end-to-end delivery. Leveraging a Master's in AI, I specialize in blending traditional Agile business consulting with hands-on GenAI solutioning. Proven track record of utilizing tools like Cursor, Claude, and Stitch to rapidly prototype UIs, automate requirement documentation, and translate complex business needs into scalable, API-driven product specifications.

Core Competencies & Technical Stack

- **Product Management:** Product Vision & Roadmap, Backlog Prioritization, Stakeholder Management, Requirement Gathering, Agile/Scrum (PSPO & PSM Certified).
- **GenAI Product Tools:** Cursor, Claude, Azure OpenAI (GPT-4), ChatGPT, LangGraph / Agentic Workflows.
- **UI Ideation & Prototyping:** Stitch (AI UI Mockups), Figma, Wireframing, Rapid Vibe Coding.
- **Enterprise Architecture:** REST APIs, Cloud Technologies (Azure), Power Automate, Python (Flask), Jira (Admin).

Professional Experience

ALIGN TECHNOLOGY, Morrisville, NC

Product Manager – AI / AI Solution Lead | June 2024 – Present

- **GenAI-Driven Product Delivery:** Architected an enterprise GenAI product workflow on Azure OpenAI to automate requirement documentation; successfully translated raw business requirements into detailed user stories, test cases, and functional specifications.
- **UI Prototyping & Solution Validation:** Utilized AI-native tools including Cursor, Claude, and Stitch to rapidly ideate UIs, mock-up application flows, and validate technical feasibility before engineering handoff.
- **Stakeholder Collaboration & Product Lifecycle:** Acted as the primary techno-functional bridge between business stakeholders and engineering teams, driving product lifecycle activities from discovery to release while ensuring a consistent UX.
- **API & Scalable Solutions:** Worked closely with engineering to design scalable API integrations, notably a Flask (Python) backend connecting AI-generated specifications directly into Jira, resulting in an 85% reduction in documentation time and \$200,000+ annual cost savings.
- **Workflow Automation & AI Orchestration:** Defined the product roadmap and engineered automated solutions, including a GPT-5 driven support ticket classification system and an AI-driven project summary generator using Power Automate, eliminating manual status reporting.

Sr. Technical Solution Analyst/Product Owner | Dec 2021 – June 2024

- **Product Vision & Backlog Management:** Defined product vision and prioritized the backlog for consumer and provider web applications, ensuring seamless UX and scalable technical implementations.
- **Requirement Translation:** Converted complex business requirements into actionable user stories and functional specifications for distributed, cross-functional engineering teams.
- **Agile/Scrum Facilitation:** Managed cross-functional Scrum teams and led the adoption of GenAI for product documentation, utilizing AI-assisted retrospectives to reduce manual effort by 40%.

- **Enterprise Platform Management:** Oversaw Salesforce CRM for lead and campaign management, while automating web app monitoring to increase sprint visibility by 30%.

Sr. Systems Analyst/Scrum Master

Align Technology, Hyderabad, IN | August 2018 – December 2021

- **Functional Specifications & UAT:** Defined functional specifications and acceptance criteria for large-scale enterprise conversational systems and portals, leading UAT and securing business sign-off.
- **UI/UX Design:** Designed interactive wireframes and UI prototypes in Figma to guide front-end application development and clarify requirements for engineering pods.
- **Application Management:** Managed Heroku applications, monitoring uptime, performance, and cross-platform integrations.

Business Analyst/SQA

Microsoft, Hyderabad, IN | June 2013 – August 2018

- Owned the functional architecture and technical requirements for large-scale enterprise rollouts, acting as the bridge between business stakeholders and development pods.
- Engineered testing strategies and facilitated cross-functional delivery to ensure product alignment with enterprise roadmaps.

Key Projects, AI Governance & Research

Entrepreneurial Projects & Enterprise AI Solutions

- **Sprintpulse.ai (Founder & Product Architect):** Spearheading the commercialization of an AI-driven Agile orchestration SaaS. Leveraged rapid prototyping (vibe coding) to architect the end-to-end platform with live API integrations across Jira, Asana, Workday, and enterprise Wikis.
- **Vitt-omni Mobile Application:** Directing the product lifecycle of Vittomni, a personal finance application; driving feature implementation and UI/UX design for an upcoming Android release entirely through AI-native development workflows.
- **Legacy Modernization & Agent Orchestration:** Utilizing Claude Code to lead the migration of legacy Ruby on Rails web applications to Next.js, while simultaneously designing and deploying specialized AI team agents within the new architecture.
- **Automated Portfolio Reporting:** Engineered a zero-touch Power Automate and Azure OpenAI workflow within MS Teams that autonomously reads leadership emails to generate formatted, tabular project status reports, eliminating manual reporting bottlenecks.

AI Governance & Academic Research

- **Medical LLM Bias Auditing:** Authored "*The Persona Gap: Auditing In-Context Bias in General vs. Specialized Medical LLMs*," utilizing a dataset of 300 patients for SHAP visualization to evaluate high-risk generative AI architectures.
- **Deep Learning NLP Research:** Published "*Detecting Fake News in Hindi Using Machine Learning and Deep Learning Techniques*" (Zenodo Preprint). DOI: <https://doi.org/10.5281/zenodo.18167945>

Education

- **Master of Science in Artificial Intelligence** – University of Texas at Austin (*Pursuing, Expected July 2026*)
- **Bachelor of Engineering in Computer Science** – SLIET, Sangrur, Punjab (*2012*)

Certifications

- **Agile & Product:** PSPO & PSM (Scrum.org) | IIBA Business Analysis | Jira Admin (Atlassian)
- **Technical:** Generative AI (Microsoft & LinkedIn) | Python PCEP (Python Institute)
